- » **Ribbon Interface** - Lytec 2010 features a new interface with ribbon technology. Similar to Microsoft Office 2007, ribbons streamline the user experience by organizing actions by related function.
- » **Increased Performance** - Lytec 2010 is fast. Client/Server version is up to 40% faster. Launching charges and payments is 80% faster. Selecting Patients in the Scheduler is twice as fast.
- » **New Flexible Grids for Claim Generation** - With Lytec 2010, you gain flexibility in configuring your electronic claims setup, allowing you to more easily handle different insurance filing requirements.
- » **Revenue Management (formerly SendClaim)** - Now included in Lytec: Revenue Management. Revenue Management combines the forces of eligibility verification, claim scrubbing with CCI and custom edits, insurance acknowledgement, ERA Claim Processing and electronic secondary claim submission all in a neat, manageable (and trackable) package.
- » **Eligibility** - Lytec 2010 gives you more control and the ability to manage your payer IDs with new eligibility data. The interface allows you to define when to check for updates and lets you update a Payer ID. This helps you handle eligibility verification issues and greatly reduces the potential for downtime.
- » **Billing Information From Appointment Screen** - In Lytec 2010, a billing column has been added to the appointment screen, so you can view charges at a quick glance.
- » **Appointment Window Refresh** - The refresh feature in Lytec 2010 allows you to view changes that other users have made to the appointment window, so that you can always get the most up to date schedule instantly.
- » **Windows 2008 32-bit and 64-bit support** - Lytec 2010 Client Server now works with Windows Server 2008 (Standard), both 32-bit and 64-bit.
- » **Lock Screen Security** - With Lytec 2010, you can lock your screen so that no one can close, minimize, maximize or restore the program.
- » **Skinning** - Lytec 2010 gives you skinning options to customized the look and feel of the application.
