

Coding Tools

Save Money and Time Increase Reimbursement

Encoder Pro Professional integrates with Medisoft to enable users to simultaneously search procedural and diagnostic codes to deliver integrated search results, code details and descriptions—all with a single keystroke and without costly code books!

Make the right coding decisions using these powerful features:

- Code Logic Search Engine. Easily search all three code sets simultaneously
- Descriptions, HCPCS Annotations and IDC-9-CM Section Notes provide important non-clinical content helps novice to experienced coders select codes quickly, accurately and with confidence
- Surgical Cross-Codes help users find all CPT add-on codes for primary procedures and verify the correct match between code sets
- Find cross codes for CPT™ and HCPCS Level II procedures
- Notepad, Bookmarks and Sticky Notes provide convenient ways to document and benefit from each code search

Simplify Code Setup and Management

Save time and reduce changes for coding errors with Codes On Disk, a powerful tool that automatically loads CPT-4, IDC-9 and HCPCS codes into your Medisoft Version 11 practice management system.

Codes can be customized with standard cost, standard charge and type of service and you can manage your codes from a single, easy to use screen and you can globally change prices to all procedure codes.
